

Grow Bags

About us

Chamundi Extrusions Private Limited (CEPL) an ISO 9001:2015 and BIS certified company, was established in the year 2010 with the objective of manufacturing high quality tarpaulin-based waterproofing products and Agriculture Products like HDPE Tarpaulin, Pond Lining, Grow Bags, Vermi Bed, Jumbo Bags, Cement Bag, Sand Bag, Woven Fabric, Wagon Cover, HDPE Delivery, Lapeta Pipe etc. With over a decade in the business, CEPL is a leading brand in the country. CEPL is a pioneer and a leading manufacturer of tarpaulins in the country. This is a result of the vision and perseverance of its founder director Mr. Barbarik S Ghuwalewala.

We produce all our products from premium quality raw-material procured from the most renowned vendors in the market. They are then processed under the guidance of expert professionals with the help of most modern machineries. The quality is tested under vital parameters at several stages of production. We make sure that our products comply with the international quality standards, global market competition and value for money.

The spirit of our company is inspired by a set of enduring values and beliefs: Integrity, Passion, Quality, Respect and Responsibility. We are guided by passion and hard work of our Company's Directors who possess strong business acumen and hold rich industry experience. This is coupled with the efforts of our diligent team of professionals who have always played a vital role in our company's growth over the years.

Based on our values and beliefs, our Brands Chamundi Tarp, Pinnacle, Splash Tarpaulin, Janta Tripal is a mark of Quality and Reliability under which our Products and Services are offered to our esteemed clients and customers.

With an installed capacity of 600 MT per month, we have integrated plant, fully equipped with latest models of extruder machines besides cutting, stitching, weaving, stretching, printing and lamination machines of brands like LOHIA, GM, Polyseal etc respectively.

Besides, we also have an advanced R&D as well as quality control lab and to ensure quality of the product, we conduct rigorous tests on parameters like weight, tensile strength, UV protection and gauge etc. The advanced machines and well-trained workforce enable us to execute all the bulk orders with perfection and within stipulated time frame.

Grow Bags

Grow Bags are generally used in terrace gardening or nursery.

They are plastic bags filled with the growing medium used for growing plants such as tomatoes, mints, etc.

Grow bags are lighter than the clay pots and are more durable.

They are made up with a combination of flexible material with tough construction to sustain the atmospheric exposure.

Grow bags regulate temperature due to their breathable quality.

Excess heat is able to escape from all sides of the grow bag.

Features

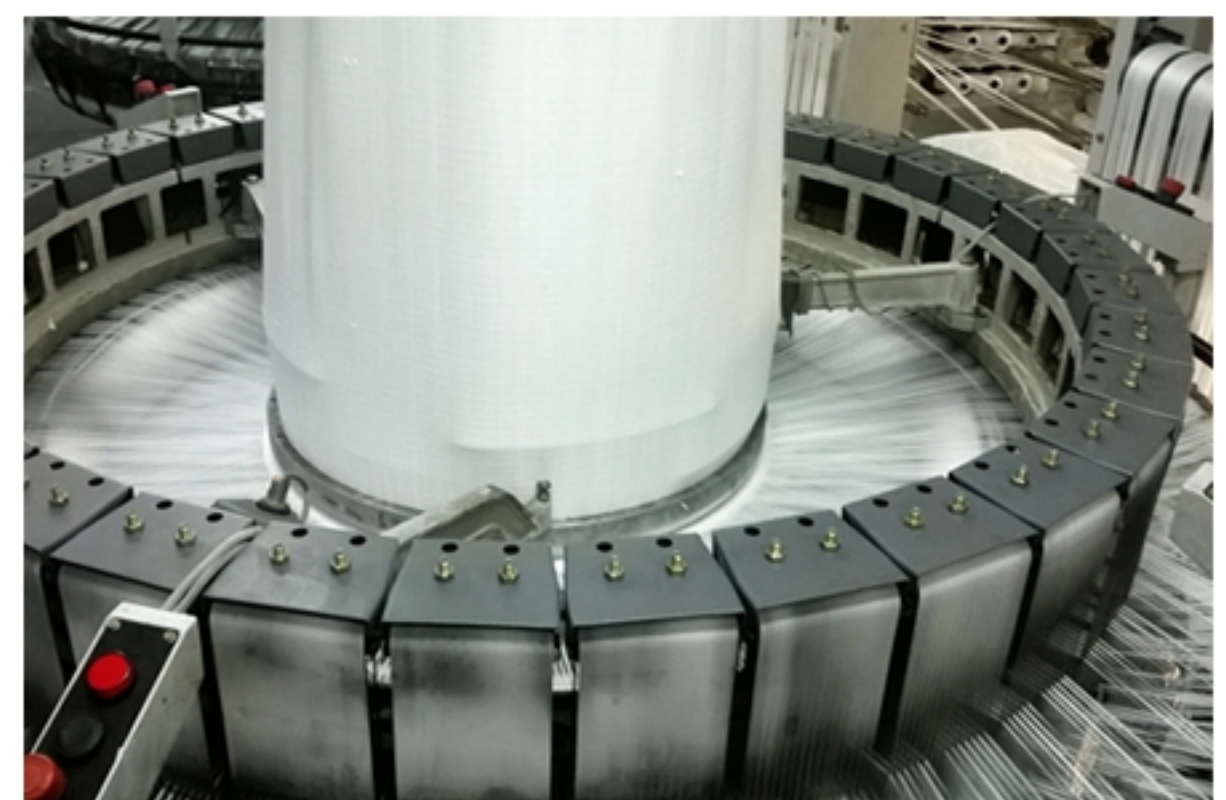

- ✓ Light weight, tough material
- ✓ Easy to handle and easy to store.
- ✓ Easy to repair and maintain.
- ✓ Prevents over watering, as water can get percolated through the fabric.
